

**Welcome to discussion on  
Joint Response Plan 2024  
11 March 2024**

1

## Protracted Crisis and Achievement

- It's 7<sup>th</sup> years of Rohingya influx
- Leadership of the GoB, the UN agencies, local, national and international organizations saved the thousands of lives
- Management and achievement in Rohingya crisis are remarkable

2

## Reducing the use of underground water, plastic use

- Pleading for reducing the limited use of underground water
- Supply of clean and safe water from surface sources
- Alternative option could be desalinization of sea water
- RRRC has circulated to limit or avoid plastic in the camps but limited compliance
- We hardly see any significant progress above issues

3

## Inclusion of Local government in the decision-making

We have a little specific information about fund spend in affected host community

Local government is hardly involved in JRP development process

We hardly see any roadmap for developing local and national NGO's leaders

4

## Safety and Security still a big concern

Various safety and security concerns lurking inside the camps

Movements during nighttime

Both communities hardly avail same facilities like health care services

Sporadic incident of trafficking, abduction, smuggling in camps

5

## Inclusion of government contribution

- Govt.'s contribution is hardly mentioned in JRP
- GoB has huge contribution in Rohingya crisis including Bhasan Char
- Very little financial contribution mentioned in JRP 2024 including management and security forced personnels involve in the response

6

## Direct services should increase

Financial	Fund received as per FTS in 2023	Rohingya family received	Direct % of fund used in humanitarian assistance
Per Rohingya family per month	\$246	\$69	28.00%
Per Rohingya refugee per month	\$51	\$12	24.07%

**Source:** COAST in-depth field survey June 2023  
**Note:** Excluding the expenditure of protection, education, health, staff salary, management cost and other cost.

7

## JRP Funding has declined!

Year	Percentage
JRP 2019	75%
JRP 2020	59%
JRP 2021	73%
JRP 2022	69%
JRP 2023	50%
Average	65%

8

## Some questions???

- Transparency on over all funding and pooled funds
- How the pooled funds are integrated to JRP ?
- What are the short term and long term objectives of pooled funds?
- Is there any proposal on loan for host community and grants from Rohingya community from WB and ADB? Why this disproportionate approach.

9

## Other cross cutting issues:

1. Fund for environment recovery needs to be added in the JRP
2. Local actors should include as backup partner in JRP
3. Improving security in camps, engaging local staff who can rapport build better
4. Common salary structure for all humanitarian actors
5. Common information disseminating platform for security and others issues
6. Marriage registration of Rohingya refugee for stopping child marriage, polygamy etc.
